OS Lab 2

Q: What is the advantage of visualization over dual boot?

Ans: The main advantage of visualization over dual boot is to operate both operating system simultaneously without buffering.

Q: What is the difference between a directory and sub directory?

Ans: Directory which holds the sub directory and work as a parent while Sub directory exists inside the directory work as a child.

Q: Why does the relative path depend on the current directory?

Ans: Because the relative path name starts wherever your program is running means the current directory

Q: Why does the absolute path always start with /?

Ans: The / indicates the root directory so that the absolute path starts with root directory then directories and sub directories.

Q: How is the home directory different from root directory?

Ans: Root directory indicates / after this home directory present /home/user made for user's personal file and documents.
