Fasiha Tariq – 53289

Submitted to:

Ma'am Ayesha Ikram

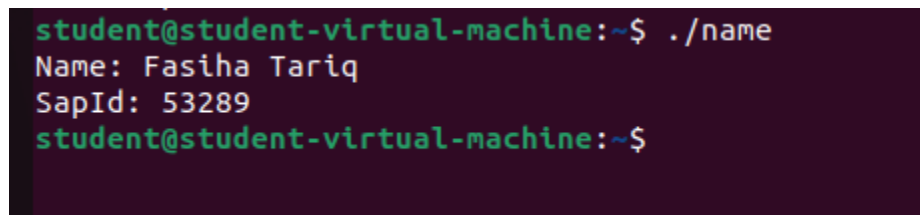

Date: September 22nd, 2025

TASKS

1. Write a C program that print your name and sap id and Show the output.

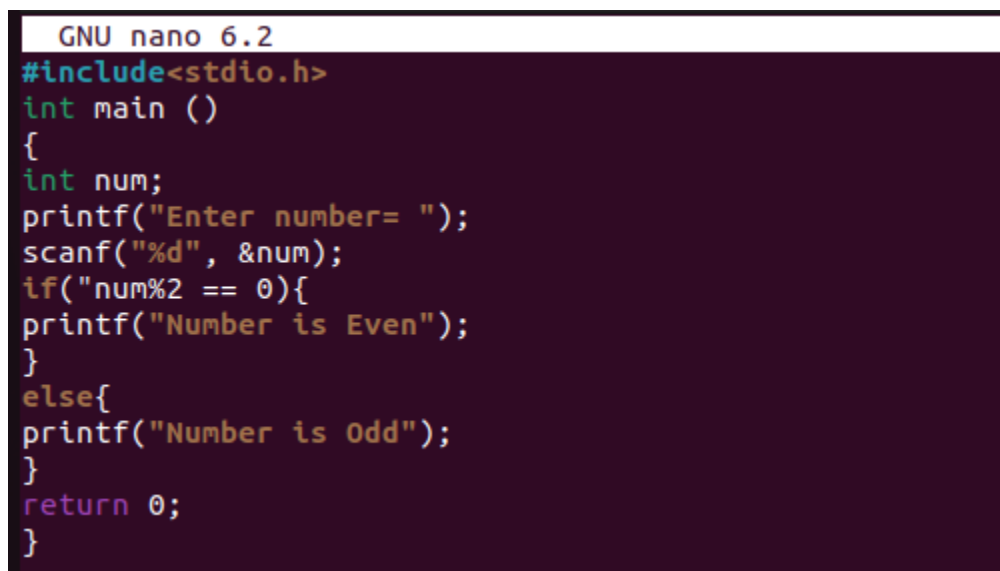

```
GNU nano 6.2
#include<stdio.h>
int main(){
printf("Name: Fasiha Tariq\n");
printf("SapId: 53289\n");
return 0;
}
```

```
student@student-virtual-machine:~$ ./name
Name: Fasiha Tariq
SapId: 53289
student@student-virtual-machine:~$
```

2. Write a C program that asks the user to enter a number and determine whether the number entered is even or odd. Show the output.

```
GNU nano 6.2
#include<stdio.h>
int main ()
{
int num;
printf("Enter number= ");
scanf("%d", &num);
if("num%2 == 0){
printf("Number is Even");
}
else{
printf("Number is Odd");
}
return 0;
}
```

```

student@student-virtual-machine:~$ pico even_odd.c
student@student-virtual-machine:~$ gcc even_odd.c -o even
student@student-virtual-machine:~$ ./even
Enter number= 3
Number is Oddstudent@student-virtual-machine:~$ ./even
Enter number= 6
Number is Evenstudent@student-virtual-machine:~$ █

```

3. Write a C program to calculate the factorial of a number using a while loop take a number from user.

```

GNU nano 6.2
#include<stdio.h>
int main()
{
    int n;
    int i=1;
    int f=1;
    printf("Enet Number= ");
    scanf("%d",&n);
    while (i<= n)
    {
        f*=i;
        i++;
    }
    printf("Factorial of %d= %d\n",n,f);
    return 0;
}

```

```

student@student-virtual-machine:~$ gcc factorial.c -o factorial
student@student-virtual-machine:~$ ./factorial
Enet Number= 4
Factorial of 4= 24
student@student-virtual-machine:~$ ./factorial
Enet Number= 7
Factorial of 7= 5040

```

4. Write a C program that uses an infinite for loop to print a name continuously.

```
GNU nano 6.2
#include<stdio.h>
int main()
{
for (int i=0;i>0;i++)
{
printf("Fasiha Tariq");
}
return 0;
}
```

5. Write a program to print average of three numbers in c program.

```
GNU nano 6.2
#include<stdio.h>
int main()
{
float a,b,c,avg;
printf("Enter a= ");
scanf("%f",&a);
printf("Enter b= ");
scanf("%f",&b);
printf("Enter c= ");
scanf("%f",&c);
avg=(a+b+c)/3;
printf("Average= %f",avg);
return 0;
}
```

```
student@student-virtual-machine:~$ gcc average.c -o average
student@student-virtual-machine:~$ ./average
Enter a= 6
Enter b= 8
Enter c= 9
Average= 7.666667student@student-virtual-machine:~$
```
